## Installation Guide for Suzuki DL650 V-Strom 2012+ GPS Bracket

Remove the 4 windshield screws and remove windshield. Remove the windshield rubber retaining grommets from the dash. Thread the 4 windshield screws partly into the retaining grommets and push back into the windshield ready for refitting. Remove the rubber blanks from the dash leaving the holes empty as shown.

Push the 4 new rubber retaining grommets into the lower (or any other position) mounting position holes.

Screw the GPS to the retaining grommets and refit the windshield to the upper (or any other position) mounting holes pushing the grommets into the dash.. **Do not over tighten these screws as you will damage the grommets.**
