Placement

OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Remove the chain guard and rear brake tube (Photo No1)
- Thoroughly clean with alcohol the area around the shock absorber, the chain guard and the front part of the swingarm.
- Clean the hugger with alcohol at the point that is shown in Photo No2 and join the Velcro's.
- Put the hugger in place to locate the exact position.
- Remove the protective film from the Velcro and slide the screws as shown (Photo No3), for the rear brake tube use the old screw while for the others use the new screws .
- Make sure that the fender is in place and tighten all screws, also press the front side of the hugger so that the Velcro tape is well attached.
