Placement

OUR COMPANY SUGGESTS THE INSTALLATION BE CARRIED OUT AT A WORKSHOP OR BY QUALIFIED STAFF

- Remove the seat.
- Turn the saddle upside down.
- Fit the clip nuts in the brackets (inner side) and stick the foam tape on brackets (at the point where the brackets are attached to the seat in order to protect the upholstery).
- Place the plastic cover over the saddle, making sure it fits nicely in the cowls "hook" (Photo No. 1)
- Place the support brackets (right & left) to hook the saddle and tighten the screws from the outside.
- Make sure the cowl is securely fitted on the saddle.
- Put the saddle in place by first adjusting the front side and then back (both ends have to go behind the ladies saddle) (Photo No. 2)..
